### CHALLENGE WORDS

1. courage
2. insect

## Lesson 10 Vocabulary List

**cable**: *n.* 1. A thick steel rope made of strands of wire twisted together. (Example: A cable with a large hook on the end dangled from the top of the crane.)

2. A bundle of wires covered by rubber or plastic along which an electric current can pass. (Example: The electric company will run an underground cable from this station to Quincy to provide extra power when it is needed.)

**cathedral**: *n.* A large and important church. (Example: The National Cathedral in Washington, D.C. is the sixth largest in the world.)

**convey**: *v.* 1. To carry or move from one place to another. (Example: A wagon with high sides conveyed the cut sugar-cane to the mill.)

2. To make an idea or feeling known. (Example: As the curtain closed, the crowd clapped loudly to convey how much they had enjoyed the play.)

**device**: *n.* Something made or invented for a particular use. (Example: When you need a device for lifting heavy weights without a great deal of effort, a lever will work best.)

**freight**: *n.* Goods carried from place to place, as by plane, boat, truck, or train. (Example: The trains passing through this station carry freight from the middle of the country to the East Coast.)

**landmark**: *n.* 1. A building or natural feature that is easy to see and can be used as a guide. (*Example: The Gateway Arch is a well-known landmark in St. Louis, Missouri.*)

2. An important event. (*Example: The discovery that certain bacteria can cause disease was a landmark in the history of medicine.*)

**method**: *n.* A way of doing something. (*Example: Tara's method for bringing her cat inside is to shake the container with treats.*)

**rod**: *n.* A thin, straight piece of wood, metal, or other material. (*Example: The shower curtain hung from a metal rod.*)

**shaft**: *n.* 1. A long open tunnel that runs straight up and down. (*Example: The coal miners traveled for five minutes to reach the bottom of the mine shaft.*)

2. A bar that connects with other moving parts of a machine. (*Example: The drive shaft sends power from the car engine to the wheels.*)

3. The long, narrow part of an arrow or other object. (*Example: Felix made sure the shafts of his arrows were in a straight line.*)

**structure**: *n.* Something that is build, as a building or bridge. (*Example: From the road, it was easy to see that the largest structure in town was the hundred-foot water tower.*)
